TOMAS SPIT

Backend Developper PHP

Following 8 years of working in as a baker I changed course and started a study in Web Development. During this study I had the chance to learn PHP, Symphony, HTML, CSS, MYSQL, JS and work with the Agile SCRUM method. Rigorous, dynamic, positive attitude and with a good team spirit, doing a bootcamp helped me acquire all the notions needed to start as a backend developer.
Open minded, I would like to make my experience available to explore new horizons and enhance my professional development.
I'm searching mainly for a CDI, but open to other propositions.

PROFESSIONAL CAREER

Backend Dev PHP Symphony

Wild Code School - Bordeaux

During my formation I had the possibility to realize several projects and improve my skills as a developer. I got to use the languages PHP, SQL, CSS, HTML and JS to the full extend with the framework SYMPHONY to create several fully working projects, including a blog with articles. Participating in 2 hackathons I had to work with a very short deadline where my organizational skills were put to the test.

Baker (Fully autonomous)

Farine et Chocolat 2021-2023

Working as a fully autonomous baker, I assured the whole production, which helped me gain a lot of experience in managing deadlines and working under pressure. Being the person that the clients talked to, to place the orders and receive possible complaints, I'm open minded, focused on problem solving and a person with good communication skills with a hands-on attitude.

ACHIEVEMENTS

- Created a blog with articles on technology and IT

CORE SKILLS

- *PHP Sypmphony*
- Method Agile Scrum
- *MySQL, SQL, JS, TWIG, Bootstrap*
- *Trilangual,* Fluent in English, Dutch and French
